Warranty, Claims & Information

Designer's Choice® Lifetime Limited Warranty

American Woodmark® hereby warrants to the original purchaser, for residential applications only, that all Designer's Choice cabinets and accessories are free from defects in materials and workmanship. This warranty runs for as long as you own your home and begins upon the date of delivery to you. This warranty is expressly limited to repair or replacement of the defective part at the discretion of American Woodmark, and does not include labor for removal or replacement. This warranty does not extend to defects caused by improper handling, storage, installation, assembly or disassembly, intentional damage, product modifications, exposure to the elements including humidity which may result in warping or splitting, accidental misuse, abuse or negligence.

Natural woods may vary in texture, color and wood grain, and exhibit subtle changes as they age. For example, wood joints may eventually have visible cracking around the joint area and cabinet colors may darken or lighten over time. Sunlight, smoke, moisture, household cleaners and other environmental conditions may cause materials to vary from their original color and/or to warp, split or crack. These variations are considered to be the nature of the material in relation to their environmental exposure and are not covered under this warranty.

Additional Limitations and Disclaimers

AMERICAN WOODMARK MAKES NO OTHER WARRANTIES OTHER THAN THOSE SET FORTH HEREIN AND ALL OTHER WARRANTIES ARE HEREBY DISCLAIMED. THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE ARE LIMITED IN DURATION TO THE LENGTH OF THE LIMITED WARRANTY PERIOD. THE LIMITED WARRANTIES SET FORTH HEREIN ARE LIMITED TO THE FIRST AND ORIGINAL BUYER AND ARE NOT TRANSFERABLE THEREAFTER. IN NO EVENT SHALL AMERICAN WOODMARK BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES TO THE PURCHASER OR TO ANY THIRD PARTY, INCLUDING, WITHOUT LIMITATION, DAMAGES ARISING FROM PERSONAL INJURY, LOST PROFITS, LOSS OF BUSINESS OPPORTUNITY, LOSS OF PROPERTY, ECONOMIC LOSSES, OR STATUTORY OR EXEMPLARY DAMAGES, WHETHER FROM NEGLIGENCE, WARRANTY, STRICT LIABILITY OR OTHERWISE. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

Claims

All claims for defective cabinets and accessories must be submitted to American Woodmark in writing and must specify the defects present in the cabinets and accessories. After American Woodmark has had an opportunity to inspect the cabinets and accessories, they will, at their discretion, either replace defective cabinets and accessories or repair any defects in the cabinets and accessories. All claims must be submitted to the following address: American Woodmark Claims Department, Post Office Box 1980, Winchester, Virginia 22604.

Continuous Improvement

In keeping with our policy of continuous product refinement, American Woodmark reserves the right to change specifications in design and materials as conditions require.

The American Woodmark legacy product line is made up of door styles, finishes, and wood species that are currently on display in many Home Depot showrooms. These products were part of a selection of styles, finishes, and species that have been discontinued and are only manufactured on a limited basis. These limited runs mean that the legacy product line is subject to extended lead times (6-8 weeks) and All Plywood Construction is required. In addition, given limited product runs, each consumer will be called to confirm their order is correct before we begin production. After the order is confirmed, changes will not be accepted to the order. Rest assured our industry leading warranty and service remain the same on this series as on all of our products.

Standard Cabinet Specs

KCMA Certified

All cabinetry manufactured by American Woodmark is certified by the Kitchen Cabinet Manufacturers Association (KCMA).

KCMA sets the American National Standards Institute/KCMA 161.1- 2000 uniform performance and construction standards for kitchen and vanity cabinets. The program is referenced by U.S. Government agencies; architects; builders; remodelers; and other specifiers.

Cabinets that bear the KCMA seal of certification are recognized as a quality product with the ability to perform after a rigorous battery of tests, simulating years of typical household use. Tests are performed by approved third-party independent laboratories.

American Woodmark is proud to display the KCMA seal of certification for cabinet construction.

Environmentally Responsible Stewardship

As a leading U.S. manufacturer of fine cabinetry, American Woodmark Corporation is committed to conducting business in a manner that both protects the environment and safeguards public health and safety. To achieve this end, the company proactively identifies potential environmental risks and monitors compliance with appropriate federal, state, local and internal standards.

The company has received certification by the Kitchen Cabinet Manufacturers Association (KCMA) Environmental Stewardship Program on all products. The certification was awarded based on compliance across a broad range of activity including air quality, product resource management, process resource management, environmental stewardship and community relations.

The company works with all suppliers to encourage sustainable forestry practices. Wood doors, drawer fronts and cabinet front frames are made from solid hardwoods. Particle board and plywood are purchased from suppliers that meet either the Composite Panel Association requirements for Environmentally Preferred Products or the Composite Panel Associations Eco-Certified Composite Standards.

The company uses leading edge technologies to limit both hazardous and non-hazardous emissions, byproducts and waste. Ongoing, formal programs identify opportunities for recycling and reusing materials. When waste ultimately requires disposal, steps are taken to minimize the environmental impact.

The American Woodmark Foundation supports local programs serving the community, including activities focused on maintaining the quality of life.

Our company is dedicated to doing our part in the preservation and sustainability of the environment.

Cabinet Front Face Frames

Cabinet front face frames are made from ¾" x 1 ⅝" solid hardwood. They are kiln-dried to prevent warping and finished using our BeautyGuard finishing system. Face frame joints are precision fixtured, pressure fitted and mechanically fastened.

Cabinet Side Panels

Cabinet side panels are ½" thick engineered wood. The exterior sides match cabinet finish and interior sides are finished with a natural woodgrain look using our TuffTech® finishing system. They are captured into a grooved front face frame and secured using high-strength fasteners and glue.

Cabinet Tops, Bottoms and Floors

Tops, bottoms and floors are ½" thick engineered wood. The exteriors and interiors are finished with a natural woodgrain look using our TuffTech® finishing system. They are fitted and glued into the cabinet front face frame grooves, then captured in the grooves of the cabinet side panels.

Cabinet Back

The cabinet back is made from ⅛" thick hardboard substrate. The inside cabinet surface is finished with a natural woodgrain look using our TuffTech finishing system.

Hanging Rails

The base and vanity top hanging rail is ¾" thick solid wood, mortise and tenon joined and glued to the cabinet side panels. The wall cabinet hanging rails are ½" thick engineered wood, glued and pinned into the cabinet back, cabinet side panels and top/bottom.

Cabinet Shelves

Cabinet shelves are ¾" thick engineered wood. The shelves are finished with a natural woodgrain look using our TuffTech finishing system. Shelves are banded on one side with edge banding. All shelves are adjustable and meet KCMA load standards of 15 pounds per square foot.

Drawer Systems

Cabinets utilize natural finish dovetail hardwood drawers with plywood bottoms and Full-Access Hidden Glides® or Full-Access CushionClose Glides. All drawers meet KCMA load standards of 15 pounds per square foot.

Drawer Systems - Deep Roll Out Trays

Deep Roll Out Trays utilize natural finish dovetail hardwood drawers. Deep Roll Out Trays feature side-mounted ¾" access drawer glides or Full-Access CushionClose glides. All Deep Roll Out Trays meet KCMA load standards of 15 pounds per square foot.

Corner Blocks

Corner blocks are attached to help ensure cabinet squareness and allow for proper countertop installation.

Hinges

Fully concealed, self-closing Hidden Hinges® are standard on all door styles.

Door Height	Number of Hinges
12" - 36"	2
39" - 50"	3

Inset Toe Kick

Inset toe kicks are constructed of ½" thick **unfinished** engineered wood and are recessed 3 ½". Standard toe kick dimensions are 4" high and recessed 3 ½". Universal Design toe kick dimensions are 8" high and recessed 6 ½".

BTK8 or BTK UD (matching toe kick) required for installation.

CONTINUOUS IMPROVEMENT

In keeping with our policy of continuous product refinement, American Woodmark reserves the right to change specifications in design and materials as conditions require.

Finishing Systems

The finishing systems used on our products are designed to ensure the beauty and durability of our cabinetry. State-of-the-art equipment allows precise sanding, filling and finish coverage of each of our products.

BeautyGuard® Finishing System

BeautyGuard is an extremely sophisticated and environmentally responsible coating that offers durability, ease of cleaning and water resistance. We use a combination of mechanical systems to bring out the richness, luster and natural grain definition of the wood, as well as computerized automation to ensure color consistency and surface smoothness. Our BeautyGuard Finishing System is a rigorous multi-step process that includes sanding, brushing, cleaning, stain application, computerized oven drying and a catalyzed topcoat to protect and beautify cabinets for years to come.

TuffTech Finishing System

Our TuffTech finishing system uses high quality materials to finish our cabinet side panels, shelves, tops, bottoms and floors. These materials ensure our cabinets are durable, easy to clean, and resistant to stain and discoloration.

Environmentally Responsible Finishing

Our panel finishing system uses only water-based paints and fillers, yielding neither hazardous waste nor water contamination. Our acrylic and urethane materials are 100% solids, dried using high-intensity lights, yielding no atmospheric emissions. Our products are extremely resistant to stains and surface damage that can be caused by common household chemicals. Our products exceed KCMA and ANSI standards for resistance to stains like coffee, grape juice and moisture.

Cabinet Care

Remove dust from cabinets frequently with a soft lint-free cloth. The cloth may be slightly dampened with water or a spray type dust remover. Wood and laminate cabinet surfaces may be polished once every few months with a high-quality, non-oil- based furniture polish. Do not use a paste wax type material. Wax buildup is difficult to remove and will leave a residue that attracts dust and moisture. Polishes containing silicon should not be used. Clean spills immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth. Do not use detergents, citrus cleaners, ammonia-based cleaners, chlorine-based cleaners, steel wool, soap pads or abrasive cleaners on cabinets.

Extra care should be taken that cabinet finishes are not exposed to heat in excess of 200° Fahrenheit (174° for Duraform thermofoil door styles). Do not place or mount small appliances beneath wall cabinets. These appliances (such as coffee makers and toasters) can produce excessive heat, which can damage the finish of cabinets. Do not expose Duraform thermofoil doors or drawer fronts to heat created from self-cleaning ovens or ranges. The HSK (Heat Shield Kit) should be used when Duraform thermofoil cabinets are installed or mounted directly next to ovens or ranges.

Allow Cabinets To Age Beautifully

Our cabinets showcase the careful selection of natural and engineered materials to achieve the best possible look. While every effort is made to match wood grain as closely as possible, no two pieces of wood are exactly alike, even from the same tree. These differences in natural color and grain mean that each piece will respond differently to the finishing materials used. For example, close-grained woods absorb less and will vary in color from more open-grained pieces from the very same tree. It's these variations that contribute to the beauty and distinction of quality wood products. However, exposure to sunlight, smoke and chemicals may cause some materials to fade or vary from their original color over time.

This is why cabinets, doors, drawer fronts and accessories added at a later date may not exactly match cabinets installed now. For the same reasons, door samples or displays may not represent the exact color of cabinets received at the time of shipment. Consumers should also read all cleaning agent instructions carefully before application.

Due to changes that occur from natural and environmental factors a cabinet is exposed to over its lifetime, we cannot be responsible for variations that occur in the finish of natural and engineered materials as they age.

Door Species & Characteristics

American Woodmark incorporates solid hardwoods and hardwood veneers. These are natural materials with inherent variations. As such, our quality standards establish tolerance ranges for matching the hardwood pieces. Consumers should review actual samples of hardwoods in our buying centers and cabinet displays to help establish realistic expectations of variations involving wood grain, color tones, presence of knots and so forth.

These variations are at the heart of the unique natural beauty of finished hardwood. In addition, exposure of wood products to sunlight, some chemical agents and smoke can cause wood colors to change over time.

Cherry

Cherry is a close-grained, multicolored hardwood with occasional pin knots and fine grain variations appearing as curls and waves. Natural features of Cherry include:

- Small sap pockets, pin knots and streaks
- Color ranges from pale yellow sapwood to deep reddish-brown heartwood, with occasional shades of white, green, pink or even gray
- Staining reveals subtle variations and colors that typically darken over time
- Variations within a single door

Maple

Maple is an exceptionally hard, finely grained wood species with a fine, even texture. Darker stains will moderate the color variance; lighter stains mellow with golden hues over time. Natural features of Maple include:

- White to light blonde tones to dark reddish-brown tones
- Small mineral streaks of light blond or reddish brown that darken with stain
- Wavy, curly bird's-eye or burl graining as well as worm tracking across the grain that will darken when stained
- Variations within a single door

Painted

Painted finishes combine hardwoods and engineered materials including solid wood, medium density fiberboard (MDF), high density fiberboard (HDF) and similar materials to achieve a product with superior stability, consistency, coverage and durability. Painted door features include:

- Joint lines caused by the natural expansion and contraction of wood
- A natural aging process that may change the tone of paint colors over time

Duraform

Duraform uses highly-technological manufacturing processes to bond foils, vinyl films and coatings to medium density fiberboard (MDF), high density fiberboard (HDF) and similar materials to achieve a product with exceptional stability, consistency and durability.

- The finish, color and texture are consistent throughout the surface
- The surface is highly durable and easy to clean
- Materials are resistant to humidity and fading
- Refer to page 33 for standard cabinet box construction

Full Overlay

Full Overlay (FOL) doors are sized to cover nearly all of the cabinet face frame. Full Overlay door styles require decorative hardware. **To facilitate proper door operation, include at least a 1" filler between the hinged side of Full Overlay door styles and deeper adjacent objects including cabinets, walls, appliances and countertops.**

Partial Overlay

Partial Overlay (POL) doors are sized to show about an inch of the cabinet face frame, giving the door some visual depth.

Refrigerator Wall Cabinets

Refrigerator Wall cabinets range from 12" to 27" high and are 24" deep.

To ensure proper door function on a Refrigerator Wall cabinet, allow enough clearance for the top hinge(s) on the refrigerator door. Review refrigerator manufacturer's specifications for dimensions and clearance requirements.

When a 24" Deep Refrigerator Wall cabinet is used in a design, remember that each side of cabinet must be attached to a cabinet, wall or Refrigerator Return Panel.

Corner Wall Cabinets

Corner Wall cabinets range in height from 18" to 48".

Corner Wall cabinets must be ordered hinged left or right.

To ensure proper door function, cabinets or other design elements deeper than 12" should not be placed on either side of the Corner Wall cabinet.

If the Corner Wall cabinet is deeper than the adjacent cabinets, fillers are recommended for placement left and right of the Corner Wall to ensure proper door operation on standard depth wall cabinets.

For a finished, decorative look add Overlay Fillers (Full Overlay door styles) to Universal Fillers or Decorative Blocks to Fluted Beaded Fillers.

To order, replace the asterisk (*) with the needed width.

Example: TOP 26 x 22

Note:

- 22" deep
- 2cm thick
- 4" high, 2cm thick set-on backsplash included (non-attached)

Use the interactive Countertop Calculator in 20-20 for help calculating countertop width, overhang, or bowl placement. Access it by dragging any countertop onto the floorplan.

COUNTERTOP OPTIONS

Width Options

Select needed width increase:

- 0.25IN - 1/4" Increased Width
- 0.5IN - 1/2" Increased Width
- 0.75IN - 3/4" Increased Width
- NOINC - No Increased Width

Note:

- No Width Options are available on the 62" countertop (TOP 62 x 22)

Color Selections

Select your countertop color, visit www.woodmarkcabinetry.com/vanity to view your available Silestone® color options.

Front Edge Treatment

Select from the following edge options:

EASED

BEVEL

BULLNOSE

Left & Right Edge Treatments

Select your edge treatment for both the left and right sides of the countertop:

- Decorative edge (matches the front edge treatment)
- Non-decorative edge (edge is polished flush)
- 4" high set-on sidesplash (non-attached) with non-decorative edge (not polished but flush)

Notes on Sidesplashes:

- Eased edge is 21 $\frac{3}{16}$ " deep x 4" high x 2cm thick
- Bevel/Bullnose edge: 20 $\frac{7}{16}$ " deep x 4" high x 2cm thick
- Adding a sidesplash does not adjust overall countertop width

No Sink Option

If a sink or drilling is not needed, select the No Sink Option. This option has no sink, sink drilling or faucet openings.

- Countertops less than 24" wide must use the "No Sink" Option

Undermount Sink Bowl Options

If an undermounted sink is needed, select from the options below:

OVAL

- Available in White or Bisque
- Double oval available (upgrade) on countertops 60" or larger

RECTANGULAR (upgrade)

- Available in White
- Double rectangular available (upgrade) on countertops 60" or larger

Notes:

- Undermount sinks are installed to countertops during manufacturing
- Available as offset or centered on the overall width of the countertop
- Measure location from left counter edge to sink center; double sinks will require a second measurement from the left edge
- Sinks include an overflow hole
- Decorative drain hardware/stopper not included
- Not available for countertops less than 24" wide

Undermount Faucet Opening Options

When using an Undermount Sink Bowl Option, select the faucet opening that matches your faucet from these options:

Notes:

- Also available with No Faucet Opening
- Faucets are not included
- Countertops less than 24" wide must use the "No Faucet Opening" Option

Vessel Options

If a Vessel Bowl is being used, select a Vessel Option with the desired faucet placement. Vessel options are available with drilling for single or double vessel bowls. Vessel bowl, faucet, mounting ring, drain hardware and stopper are not included.

**VESSEL FAUCET
CENTER***

**VESSEL FAUCET
LEFT***

**VESSEL FAUCET
RIGHT***

**NO VESSEL FAUCET
FOR WALL-MOUNT FAUCET**

All countertops for vessel bowls are drilled with 1 3/4" diameter drain hole.

*Countertops are drilled with 1 3/4" diameter faucet hole.

Vessel Faucet Opening Options above are shown drilled for single vessel bowl. Countertops drilled for double vessel bowls are drilled with one faucet hole for each bowl using the selected Vessel Faucet Opening Option (Center, Left, Right) unless the No Vessel Faucet Option is selected. Additional faucet configurations available for double vessel bowls include:

- BOTH OUTER: faucet for left vessel bowl is drilled using VESSEL LEFT option and faucet for right vessel bowl is drilled using VESSEL RIGHT option
- BOTH INNER: faucet for left vessel bowl is drilled using VESSEL RIGHT option and faucet for right vessel bowl is drilled using VESSEL LEFT option

Notes:

- Vessel Sink Options are recommended for sinks sized between 16"-17" from front of bowl to back of bowl
- Not available for countertops less than 24" wide
- For above-counter vessel bowls only
- Vessel sink must require a 1 3/4" or smaller diameter drain hole - refer to vessel manufacturer specifications
- Vessel sinks with an overflow hole, or that are pre-drilled for a faucet mounted on the vessel bowl, are not recommended
- The VESSEL FAUCET CENTER or NO VESSEL FAUCET are recommended when using a square or rectangular vessel bowl
- Offset vessel options must indicate drain location from left countertop edge to drain center; double sinks require a second measurement from the left edge to second drain center
- Vessel Faucet must be compatible with 1 3/8" diameter drilled faucet hole - refer to manufacturer specifications for dimensions and requirements for vessel faucet spout
- Dimension from back of countertop to drilled drain hole location is dependent on Vessel Faucet Opening Option selected
- Must verify all vessel and faucet clearance recommendations and dimension requirements
- Faucet(s) should have adequate clearance for proper functioning of handles, not blocked by bowl or backsplash
- Installation of the backsplash is optional - if necessary, backsplash can be left uninstalled to provide additional space for proper functioning of faucet

Wall Top Hinge Cabinets

Wall Top Hinge cabinets are 30" or 36" wide, 15" or 18" high and 12" deep.

Hanover in Breeze, Cascade and Drift features a door with vertical grain direction. All other door styles use a standard wall door in horizontal orientation which causes rails, stiles and insert panel grain direction to differ from standard wall cabinets.

For Increased Depth cabinets, please refer to the installation notes listed in the Increased Depth Construction Option section.
